

Room thermostat with in-dependent DHW control

for heating systems

**RDD100.1
DHW**

- Room temperature control
- 2-position control with ON/OFF control output
- Independent On/Off control of DHW
- Comfort, Economy and Protection mode
- Adjustable commissioning and control parameters
- Battery-powered DC 3 V (2 x 1.5 V AAA)

Use

The RDD100.1DHW is used to control the room temperature in heating systems with independent control of DHW.

Typical applications:

- Apartments

For the control of the following plant components and of DHW:

- Thermal valves or zone valves
- Gas or oil boilers
- Fans
- Pumps
- Heat exchanger

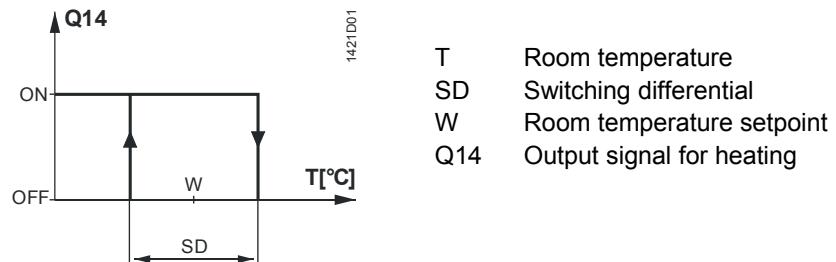

- Continuous-flow water heater
- Small water heating systems

Functions

- Room temperature control via built-in temperature sensor
- Selection of operating mode with operating mode touchkey
- Display of current room temperature or setpoint in °C or °F
- Touchkey lock (manually)
- Setpoint lock
- Reloading factory settings for commissioning and control parameters
- Independent DHW

Temperature control

The unit acquires the room temperature with its built-in sensor and maintains the setpoint by delivering control commands. The switching differential is 1 K.

Type summary

Product No.	Stock No.	Features
RDD100.1DHW	S55770-T277	DHW room thermostat Battery-powered DC 3 V

Ordering

- When ordering, please indicate product No./stock No. and description
- Example:

Product No.	Stock No.	Description
RDD100.1DHW	S55770-T277	DHW room thermostat

- Valve actuators must be ordered separately

Equipment combinations

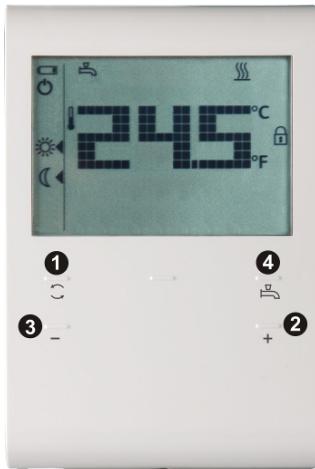

Description		Product No.	Data Sheet
Electromotoric actuator		SFA21..	4863
Electrothermal actuator (for radiator valves)		STA23..	4884
Electrothermal actuator (for small valves 2.5 mm)		STP23..	4884
Damper actuator		GDB..	4634
Damper actuator		GSD..	4603
Damper actuator		GQD..	4604
Rotary damper actuator		GXD..	4622

Mechanical design

The room thermostat consists of 2 parts:

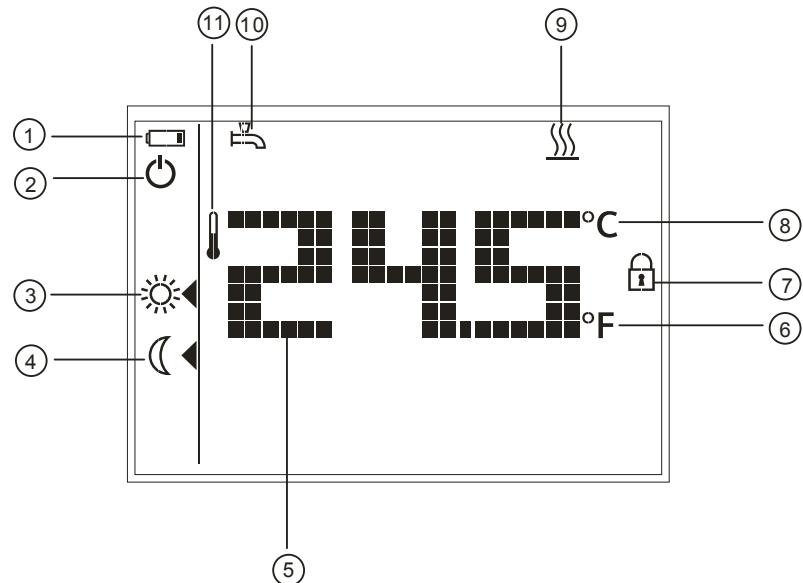

- Plastic housing which accommodates the electronics, the operating elements and the room temperature sensor
 - Mounting plate with screw terminals
- The housing engages in the mounting plate and is secured with a screw.

Operation and settings

- 1) Operating mode touchkey
- 2) Touchkey for increasing a value
- 3) Touchkey for decreasing a value
- 4) DHW switch On/Off touchkey

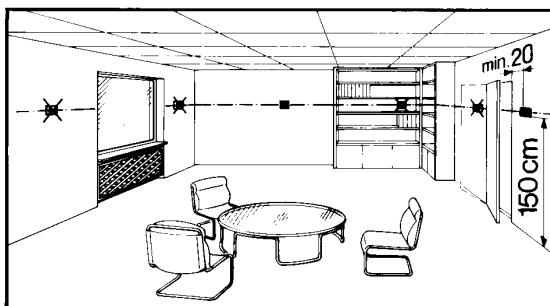

Display

#	Symbol	Description	#	Symbol	Description
1	■	Indicating that batteries need to be replaced	6	°F	Room temperature in degrees Fahrenheit
2	⊕	Protection mode (protection mode symbol can be enabled via parameter settings)	7	🔒	Touchkey lock activated
3	☀	Comfort mode	8	°C	Room temperature in degrees Celsius
4	⌚	Economy mode	9	⚡	Heating On
5	245	Display of room temperature, setpoint, etc.	10	▶	DHW On
			11	🌡	Current room temperature

Mounting and installation notes

Do not mount the thermostat in niches or bookshelves, not behind curtains, not above or near heat sources, and not exposed to direct solar radiation. Mount about 1.5 m above the floor.

Mounting

- Mount the thermostat in a clean and dry location without direct air flow from a heating/cooling equipment, and not exposed to drip or splash water

Wiring

See the Mounting Instructions M1429 enclosed with the thermostat.

- Ensure that wiring, fusing and earthing comply with local regulations
- Correctly size the cables to the thermostat and the valve actuators
- Use only valve actuators rated for AC 24...230 V
- The AC 230 V mains supply line must have an external fuse or circuit breaker with a rated current of no more than 10 A
- Disconnect from power supply before removing the unit from its mounting plate

Commissioning notes

Commissioning

After power is applied, the thermostat carries out a reset during which all LCD segments flash, indicating that reset was made correctly. After the reset, the thermostat is ready for commissioning by qualified HVAC personnel.

The control parameters of the thermostat can be set to ensure optimum performance of the entire system. Please refer to Operating Instructions CB1B1421, section "Do you want to change parameters?".

Sensor calibration

If the temperature on the display does not agree with the room temperature effectively measured, the temperature sensor can be recalibrated. For that purpose, adjust parameter P04.

Setpoint and setpoint lock

We recommend to review the setpoint range and setpoint lock (for public areas) using parameters P05...P08 and change them as needed to achieve maximum comfort and energy savings.

Touchpad scanning rate

Since the thermostat uses touch technology and to minimize battery power consumption, a parameter P21 (adjustable from 0.25 to 1.5 seconds) is implemented for the user to adjust. This function is only valid for the battery-powered version and the default value is 1 second.

This means that when, for a certain time, the user does not touch the touchpad, the unit operates in power saving mode and the touchpad is running at a scanning rate of 1 second.

(From the calculation – assuming 4 operations per day on the thermostat, the estimated 1-second scanning rate results in a battery life of 1 year. If the user increases the scanning rate, the batteries' life is extended.)

Change of batteries

If the battery symbol  appears, the batteries are almost exhausted and should be replaced. Use alkaline batteries type AAA.

Operating notes

The RDD100.1DHW provides Comfort, Economy and Protection mode. The difference between Comfort and Economy mode is only the room temperature setpoint. The changeover between Comfort, Economy and Protection mode is made by pressing touchkey .

Comfort mode

When Comfort mode is activated, symbol  appears on the display. The setpoint (20 °C) can be readjusted by pressing touchkeys + and -.

Economy mode

When Economy mode is activated, symbol  appears on the display. The setpoint (16 °C) can be readjusted by pressing touchkeys + and -.

Protection mode

If the temperature falls below 5 °C, the unit automatically activates the heating output. The symbol  appears only, if the icon is enabled via parameter settings.

DHW

When this DHW function is activated, symbol  appears on LCD.

Maintenance notes

The thermostats are maintenance-free.

Disposal

In terms of disposal, the room thermostats are classified as electronic scrap conforming to the European Directive 2011/65/EU (WEEE) and must not be disposed of as unsorted domestic waste. The relevant national legal regulations must be complied with and the units must be disposed of via the appropriate channels. Local and currently valid legislation must be observed.

Technical data

Power supply

Operating voltage

- RDD100.1DHW DC 3 V (2 x 1.5 V alkaline batteries AAA)

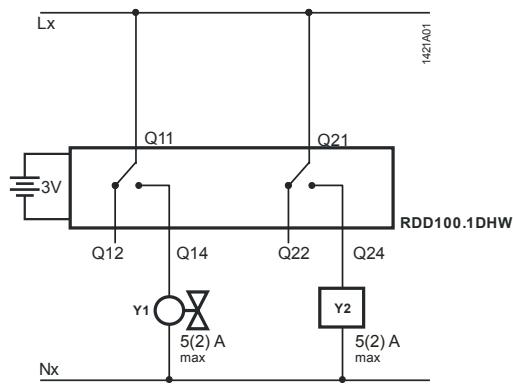

For battery life (RDD100.1DHW), see below (alkaline batteries type AAA).

Battery life calculation is based on the touchpad scanning rate during idle time (assuming a user presses 4 touchkeys per day):

Scanning rate 0.25 s	193 days battery life
Scanning rate 0.50 s	273 days battery life
Scanning rate 1.00 s	345 days battery life
Scanning rate 1.50 s	378 days battery life

All dimensions in mm

Remarks

Heating:

Because of the unavoidable self heating effects of the electrical current, any loads of more than 3 Amperes connected to the unit can influence the control behavior and temperature accuracy in a negative way.
